Residential Broadband	Within 2 calendar days

Note: Working hours include 09:00 to 17:00 on Monday to Friday and 09:00 to 13:00 on Saturday except Public Holiday.

Target Service restoration time does not cover the following situations:

- The Customer's premises are inaccessible or the need to coordinate an appointment where work on the Horizontal Blockwiring and/or the Termination Socket is required
- Power failure at the relevant Blockwiring Building
- Additional time awaiting approval from the Requesting Operator, management of the relevant Blockwiring Building, and/or the Customer
- Natural disaster
- Major cable fault
- Weather constraints including severe thunderstorm, black rain storm or typhoon warnings of number 8 and above which may affect staff safety on carrying out repair duties
- Public transportation not available

- Blockwiring Building not readily accessible, or is located in outlying island, restricted areas or hill tops
- Replacement / removal of wiring required
- The maintenance work to be performed by the Providing Operator involves replacement of any circuit or any planned outage
- Site constraint including conduit congestion and/or blocked conduit
 - Customer rejects exposed wiring
 - If 2 end join test is required, on site time will need 4 working hours more from the field installer report time

Complaint Handling

Complaint acknowledgement*	Within 1 working day upon receipt
Complaint handling*	Within 5 working days

* Based on 80% of general complaint cases

The aforementioned time does not cover the following scenario:

- Customer busy / unreachable
- Insufficient information provided by customer / awaiting customer's decision and or supporting
- On site checking required
- Joint service provision with other service providers
