

For immediate release

HGC and Macroview collaborate to launch WiseNET CloudConnect leased-line service

*Enterprises can now connect to the
Microsoft Azure cloud platform securely and reliably*

Hong Kong, 16 April 2015 - Hutchison Global Communications Limited (HGC), the fixed-line division of Hutchison Telecommunications Hong Kong Holdings Limited (HTHKH; stock code: 215), today announced collaboration with Macroview Telecom Limited (Macroview), a leading IT systems integrator. The result is launch of WiseNET CloudConnect leased-line service, enabling enterprises to connect their data centres to the Microsoft Azure cloud platform in a secure, reliable and cost-effective way to reap the benefits of cloud computing.

Jennifer Tan, HTHKH Chief Operating Officer, said: "In recent years, HGC has been dedicated to developing cloud-based solutions and establishing a telecoms-grade public cloud service. At the same time, we have seen strong demand from corporate customers for connectivity to popular public cloud platforms. We have therefore partnered with Macroview to launch a corporate-grade leased-line cloud service based on our comprehensive network infrastructure. Our role as a cloud network service enabler is demonstrated by connecting customers to the Microsoft Azure cloud platform via WiseNET, a network service of the highest international Ethernet specifications."

P H Tang, Macroview's Chief Technology Officer, said: "Huge demand exists for public cloud, and Macroview's wealth of experience in ICT solutions integration, coupled with HGC's advanced infrastructure, enables us to provide customers with a comprehensive cloud solution. We can deliver the latest hybrid cloud technology to customers via our collaboration to launch the WiseNET CloudConnect leased-line service."

Pre-integration with Microsoft Azure enables connectivity within short time frames

Pre-integration of HGC Metro Ethernet network WiseNET with the Microsoft Azure cloud platform means customers are now able to connect via WiseNET CloudConnect within short time frames and without hefty investment in network integration and purchase of equipment. This enables enterprises to handle ad-hoc transmission tasks and conduct product research and development with ease.

High-speed and low latency ensures secure and reliable transmission

Powered by the MEF CE 2.0-certified Cisco platform, WiseNET network from HGC provides stable and high-speed data transmission with latency of less than one millisecond, and works to a service availability target of 99.98%. Suitable for any industry, WiseNET CloudConnect offers a secure and reliable private leased-line connection to popular public cloud platforms. The Microsoft Azure cloud platform is used extensively by corporations,

including more than half the enterprises¹ in the Fortune Global 500. Launch of WiseNET CloudConnect service satisfies high-end demands for data transmission.

Combining strengths to launch a one-stop hybrid cloud solution

HGC's collaboration with Macroview brings together the strengths of a telecoms operator and cloud service providers to create a one-stop corporate-grade hybrid cloud solution.

This offering comprises the Microsoft Azure public cloud platform, private cloud storage from NetApp, Cisco's integrated cloud management solutions, Macroview's one-stop systems integration and cloud management service and the WiseNET CloudConnect leased-line service. Customers can now enjoy the flexibility and cost-effectiveness of public cloud, coupled with secure and reliable connectivity.
