## HGC and Centrin Online launch ibizCloud service in Indonesia

**Hong Kong and Jakarta, 7 February 2017** - Hutchison Global Communications Limited (HGC), the fixed-line operating arm of Hutchison Telecommunications Hong Kong Holdings Limited (stock code: 215), and PT Centrin Online Prima (Centrin Online), a leading Indonesian Internet service provider (ISP), today announced launch of ibizCloud in Jakarta, Indonesia. This will provide a one-stop global cloud service that meets the infrastructure and speed requirements of local and international enterprises.

ibizCloud has been tailored to the Indonesian market. HGC provides cloud technologies and service design, as well as international connectivity, and holds a wealth of experience in designing cloud services to suit niche markets. Correspondingly, Centrin Online provides local connectivity and will now be able to offer cloud service instantly without having to go through a product development process. This helps the company meet increasing demand for data exchanges from corporations operating in Indonesia.

### **Quick and easy access to capacious data storage**

Offered as a total solution, ibizCloud enables the Indonesian business community to access reliable cloud storage without having to make hefty upfront investment in infrastructure. In fact, ibizCloud makes managing and carrying huge volumes of data much easier. The service helps enterprises keep pace with the big data trend by granting access to a cloud environment via Infrastructure-as-a-Service (IaaS), Bandwidth-as-a-Service (BaaS) and Dedicated Bandwidth-as-a-Service (DBaaS). Customer organisations can also choose to use on-demand Virtual Leased Line (ODVLL), which facilitates end-to-end data transmission over a secure network. ibizCloud comes complete with virtualised infrastructure such as virtual machines, CPU cores, RAM and storage. All this enables corporations to access the Internet without restrictions on data volumes.

### **Enhanced ibizCloud features include resource pool arrangement**

Andrew Kwok, President of International and Carrier Business at Hutchison Telecommunications (Hong Kong) Limited, said: "Making ibizCloud available in Jakarta represents a great start to 2017 for HGC. The new cloud site strengthens ibizCloud's market position in Asia, following launch of the service in Hanoi last December. HGC works tirelessly to enhance ibizCloud features in order to meet ever-rising demand from multinationals. One of the value-added features to look out for in early 2017 will be a resource pool arrangement by which customers can allocate additional resource promptly, without having to go through a subscription process."

Centrin Online CEO Ismail Hirawan said: "We are proud of this collaboration between Centrin Online and HGC to extend ibizCloud into Indonesia. The move offers attractive opportunities to provide fast, reliable and secure world-class cloud service. ibizCloud is tailored to the ISP market, in which we have more than 25 years' experience."

-Ends-

### **About Hutchison Global Communications Limited**

Hutchison Global Communications Limited (HGC) is a leading fixed-line operator, IT service provider, carrier's carrier and one of Hong Kong's largest-scale Wi-Fi service providers. HGC empowers local and overseas customers with one-stop international, corporate, data centre and residential broadband services. HGC owns and runs an extensive optical-fibre network, coupled with four cross-border routes integrated with three of mainland China's tier-one telecoms operators, plus a world-class international network. The company is committed to developing cloud computing services and offering high-speed Wi-Fi service under the "HGC On Air" brand. HGC is a subsidiary of Hutchison Telecommunications Hong Kong Holdings Limited (stock code: 215), a group member of CK Hutchison Holdings (stock code: 1).

### **About PT Prima Centrin Online**

PT Centrin Online Prima's forerunner, PT Khasanah Timur Indonesia, was founded in 1995. A year later, the company started an Internet service provider business branded Primanet. Then in 2013, PT Khasanah Timur Indonesia became PT Centrin Online Prima and established the Centrin Online brand. PT Centrin Online Prima operates in major cities such as Jakarta, Bandung, Denpasar, Medan and Surabaya.

In 2013, PT Centrin Online Prima developed a triple-play network capability by integrating Internet access, telephony and pay-TV, all delivered as a one-stop IT solution.

Online Centrin focuses on corporate and retail business in the middle premium market, which is served by three main providers including PT Centrin Online Prima. A proliferation of construction projects and property development has generated significant growth for PT Centrin Online Prima's customer base.
