

For Immediate Release

HGC joins forces with Oracle to provide Hong Kong enterprises with world-class cloud computing services

Hong Kong, 18 January, 2012 - Hutchison Global Communications Limited (HGC), the fixed-line division of Hutchison Telecommunications Hong Kong Holdings Limited (HTHKH; Stock Code: 215) and global software and hardware giant Oracle today announced a business collaboration that will result in HGC becoming a world-class cloud service provider to serve Hong Kong's enterprise and mid-market commercial customers.

Based on the collaboration with Oracle in Hong Kong, HGC will provide a wide range of enterprise-grade cloud services that will equip companies with unparalleled access to best-in-class infrastructure, platform and business applications that are flexible, secure and cost effective.

HGC operates one of the fastest, high-bandwidth, optical-fiber networks in Hong Kong and holds more than 10 years of experience in managing world-class data centres. These capabilities combined with Oracle Exadata Database Machine and Oracle Exalogic Elastic Cloud engineered systems will provide customers with a high-speed network and high-performance computing for running mission-critical business applications in a virtual private cloud environment - all in a way that helps ensure customers have the security and control they need.

HGC will offer cloud-based business continuity and disaster recovery services, along with real time data backup and application hosting using Oracle private and public cloud solutions. Provision of industry-specific business applications will follow.

HTHKH Chief Executive Officer Peter Wong said: "We are delighted to announce this business collaboration with an IT player the stature of Oracle. HGC owns one of Hong Kong's most extensive fibre-to-the-building networks, which already combines with our data centre capabilities to provide world-class connectivity, co-location and facilities management offerings. This important relationship with Oracle will now put HGC's combination of sophisticated capabilities to work to provide access to cloud-based services that will help

our enterprise customers achieve business agility, cost efficiencies and a sharper competitive edge."

Steve Au Yeung, Executive Vice President, Oracle Asia Pacific said: "Our collaboration with HGC will help deliver high-speed infrastructure and high performance mission-critical computing, enabling companies to safely put their business applications in the cloud. Oracle is excited to team up with HGC, as it uses Oracle hardware and software to run a highly-advanced optical-fibre network and world-class data centre facilities to deliver cloud services in the Hong Kong market."

About Hutchison Global Communications Limited

Hutchison Global Communications Limited (HGC) owns one of the largest fibre-to-the-building telecommunications networks in Hong Kong. Since establishment in 1995, it has been fully committed to building its own 100% optical fibre network infrastructure and introducing the most advanced facilities. Coupled with its four cross-border routes integrated with all three of mainland China's tier-one telecommunications operators and world-class international network, HGC provides a comprehensive range of fixed-line telecommunications services locally and overseas. HGC is a subsidiary of Hutchison Telecommunications Hong Kong Holdings Limited (HTHKH; Stock Code: 215). HTHKH is a leading integrated telecommunications service operator, offering mobile and fixed-line services to local and international customers.
