HGC Broadband launches “Smart Home Living” offer for building your ideal smart home

Hong Kong, 23 October 2020 – HGC Broadband, the home broadband service offered by HGC Global Communications Limited (HGC), announced today the launch of its “Smart Home Living” offer. Customers who apply for the designated home broadband plan and complete installation will receive exciting smart home devices. Combined with high-speed and stable home broadband, smart technology can make daily life easier and more convenient and ensure more effective management of the home and domestic lifestyle.

1G home broadband plan with smart home kit

Starting from today, new customers who switched from designated home broadband service providers can select a designated 1G home broadband plan with a smart home kit and installation, starting at \$119/month*. The package includes a home security camera (1080P), window and door sensors, a control hub and a Wi-Fi router, allowing customers to connect and control multiple smart home devices through the control hub to form a smart home system.

A free smart body scale with a designated home broadband plan registered online

With home confinement becoming the new normal during the pandemic, people may worry about their health due to the reduced level of exercise. The smart body scale can track and calculate the body data such as weight and body BMI through smart technology, allowing everyone to review their health status at a glance. Register for the designated 1G home broadband plan online from and complete the installation to get the smart body scale for free*.

*Offers are subject to relevant terms and conditions, please refer to:
