

[For Immediate Release]

HGC Launches Mobile Intelligence API Platform to Streamline API Deployment for Mobile Network Operators

London, 23 October 2025 – [HGC Global Communications](#) (HGC), a fully-fledged ICT service provider and network operator with extensive global coverage, today announced the launch of its Mobile Intelligence API Platform (MAP), an innovative solution for Mobile Network Operators (MNOs). This launch builds upon HGC's partnership with the GSMA announced earlier this year, through its participation in the Open Gateway initiative as a Channel Partner. HGC's MAP enables MNOs to quickly launch a range of mobile intelligence Application Programming Interfaces (APIs) in line with the CAMARA specification supported by the GSMA's Open Gateway initiative, underscoring HGC's commitment to advancing the global mobile intelligence ecosystem.

HGC's MAP enables MNOs to deploy a full suite of mobile intelligence APIs using their network data. This capability empowers MNOs to take a proactive role in the digital ecosystem, strengthening user protection and trust through security-focused services such as Number Verify, SIM Swap and over 30 additional APIs. By adopting HGC's one-stop shop platform, MNOs gain seamless API enablement, billing, monitoring and reporting services — all in one place. This drastically reduces costs and time, while bridging the gap between MNOs and the global developer community. APIs developed through MAP are aligned with CAMARA specifications, making integration and delivery smooth and secure.

Furthermore, every API developed on the platform can be integrated with HGC's established global mobile intelligence marketplace, granting instant access to an extensive network of enterprises — from financial institutions to application-driven businesses. This end-to-end connectivity empowers MNOs to effortlessly transform existing network data into diversified revenue streams, unlocking new monetization opportunities at pace.

Irfan Abubaid, Vice President of Global Messaging & Digital Services, International Business of HGC, said, "We are seeing a surge in demand for standardized mobile intelligence APIs, as they empower MNOs to contribute to user security services and unlock new revenue streams. To meet this need, HGC launches a platform which aligns with GSMA's initiative and CAMARA specifications, helping MNOs build and deploy standardized APIs with ease."

Niklas Bergvall, Head of Mobile Identity Solutions, International Business of HGC, said, "HGC's Mobile Intelligence API Platform empowers MNOs to launch APIs such as Number Verify and SIM Swap. Designed as a one-stop platform, it simplifies API deployment, billing, monitoring, and reporting, enabling MNOs to strengthen user trust while unlocking new revenue streams from existing data."

About HGC Global Communications Limited

HGC Global Communications Limited (HGC) is a leading Hong Kong and international telecom operator and ICT solution provider. The company owns an extensive network and infrastructure in Hong Kong and overseas and provides various kinds of services. HGC has 20 global offices and staff presence in 33 cities worldwide. It provides telecom infrastructure service to other operators and serves as a service provider to corporate and households. The company provides full-fledged telecom, data centre services, ICT solutions and broadband services for local, overseas, corporate, SME and mass markets. HGC owns and operates an extensive fibre-optic network, five cross-border telecom routes integrated into tier-one telecom operators in mainland China and connects with hundreds of world-class international telecom operators. The company is committed to further investing and enriching its current infrastructure and, in parallel, adding on top the latest technologies and developing its infrastructure services and solutions. In 2019, HGC Group completed the acquisition of Macroview Telecom Limited (Macroview), a leading digital technology solution and managed services provider. The addition of Macroview further accelerates HGC Group's digital transformation path and positioning as a pioneering ICT and digital services leader. HGC is a portfolio company of I Squared Capital, an independent global infrastructure investment manager focusing on energy, utilities, transport, social infrastructure, digital infrastructure, and environmental infrastructure in North America, Europe, Latin America and Asia.
