

Terms and Conditions for Indoor Wi-Fi:

1. The indoor Wi-Fi is an embedded feature of broadband modem. No additional equipment will be provided.
2. Customers are required to have Wi-Fi 802.11b/g wireless compatible equipment to gain wireless internet access via modems.
3. The quality of wireless connection speed would be affected by internal structure of the premises as well as other factors, including any physical obstruction, the floor plan of the unit, the thickness of wall and the distance between the equipment and Wi-Fi modem, etc.
4. A maximum of 8 users are allowed for wire or wireless connection under the indoor Wi-Fi Premium Plan of BBS.
5. Please activate the indoor Wi-Fi service or make relevant changes to settings at www.on-nets.com.
6. Indoor Wi-Fi may not be available after relocation of installation address of BBS or change of IP type.
